Description

Tool designed to twist together two strands of standard 11 or 12 gauge Single Loop Baling ties.

An Easy way to twist wire after feeding through the loop of a bale tie. Reduces time and less stressful on muscles and fingers. Helps avoid cuts and scrapes. Required by many national brand retailers.

Note : Tool twists wire together to replace hand twisting. It creates a knot that will not pull apart. It does not tighten the wire on bales like a steel strapping tool. This is normal for most grades. Bale expansion will naturally tighten wire on bales.
